

Exercise - Clarify expectations in supervision

Whose responsibility is it? - Supervisor and PhD student complete, then discuss.

(after Taylor & Beasley 2005)

Issue	1 = supervisor		PhD student = 5			Comments
	1	2	3	4	5	
Selection of student's research topic						
Establishing the theoretical framework for the research						
Identifying background reading for the student						
Developing a project plan						
Organising regular tutorial meetings						
Making PhD student aware of university regulations						
Making PhD student aware of facilities and resources in department/university						
Organising TAC meetings						
Ensuring that student's research project is on track and on schedule						
Providing resources that will support the student's research						
Maintaining an effective working relationship between supervisor and student						
Ensuring that the thesis will be of an acceptable standard when submitted
